Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-16 are rejected under 35 U.S.C. 103(a) as being unpatentable over Yamada et al. (U.S. Patent No. 4,727,419).

Yamada et al. '419 disclose system and method for electronically identifying tires downstream from one processing station to another. The method comprises providing means for locating a barcode and identification marks on the circumference of the tire at a first stage 3. The method comprises providing movable cameras for reading the barcode and identification marks at a second stage 4 and third stage 5 downstream from the first stage (Figure 1). It is obvious that the means and method for electronically identifying tires is applicable to identifying wheels, since Yamada et al. '419 anticipate all method steps per claimed invention.

In regards to claim 4, it is obvious that stage 4 and 5 could be regarded as a single second stage (Figure 1).

In regards to claims 7 and 15, Yamada et al. '419 comprise the step of rotating the tire such that the barcode and identification marks are oriented for interception by the cameras (column 5, lines 36-38).
